

010047

1
In this supplemental DEIS the assertions by the Department of Energy (DOE), are based on guidelines that the public has never seen. New guidelines and regulations were proposed, a great number of critical comments were received and nothing has been finalized, yet this supplemental DEIS asserts that the proposal is safe by these new, less rigorous guidelines. This entire process is premature, how can we move forward without final, safe, publicly acceptable guidelines in place
